Bachelor of Science, Computer Information Systems *Expected December 2026*
Relevant Courses: Software Engineering (Agile/Scrum), Business Analysis, Database Management Systems, Data Visualization, Management Information Systems
Honors: President's List, Dean's List, LIFE Scholarship Recipient

WORK EXPERIENCE

Alesian **New York, NY**
Technology Associate *September 2023 to Present*
- Served as the in-house tech lead for a luxury asset firm with offices in 6 global cities
- Managed the company website, business software, and user accounts to keep the team running
- Presented investment opportunities in strategy meetings with board members
- Built financial models and investment theses for art and estate partnerships and acquisitions
- Partnered with auction houses and private dealers to support deal research and sourcing

Poinsett Groceries **Greer, SC**
Information Technology Intern *June 2025 to August 2025*
- Led all on site store tech, including registers, cameras, inventory software, and payment systems
- Deployed 2 new registers from setup to launch with minimal downtime during store hours
- Fixed hardware and software issues independently to keep checkout lanes and back-office systems running

7-Eleven Corporation **Spartanburg, SC**
Information Technology Intern *June 2024 to August 2024*
- Served as the main tech resource for store staff across registers, cameras, inventory tools, and payments
- Tested new register hardware during rollout, fixing problems before they reached customers
- Cut outside vendor calls by solving register, camera, and network issues in house

PROJECT EXPERIENCE

LayStat | AI Sports Analytics Platform *(React, Supabase, PostgreSQL, Claude API, Netlify)*
- Launched an AI platform that analyzes bets in seconds, saving users **20+ minutes per slip**
- Defined requirements and shipped bet grading, bankroll tracking, and odds comparison tools
- Designed the database and integrated 3 APIs: Claude, Gemini, and The Odds API

Good Driver Incentive Program | Senior Capstone *(AWS Elastic Beanstalk)*
- Built a web app where sponsor companies reward truck drivers with points redeemable for products
- Delivered driver, sponsor, and admin roles with point tracking, a product catalog, and application approvals
- Shipped in 2-week Scrum sprints with a 4-person team and deployed to AWS

Horizon Health Patient Registration | Business Analysis Case Study *(Visio)*
- Gathered requirements and mapped current and future state patient registration processes
- Produced process models, use cases, and diagrams to recommend system improvements

Color Canyon RV Resort Website *(HTML, CSS, JavaScript, Python)*
- Launched a 7-page website for a family-owned RV resort, co-managing the business
- Wrote a Python build script that automates content updates and keeps every page consistent

LEADERSHIP & ACTIVITIES

Clemson FinTech Club **Clemson, SC**
Member *August 2024 to Present*
- Built a Postman API demo and turned the output into Tableau and Power BI dashboards

BAPS Swaminarayan Sanstha **Greenville, SC**
Mentor *September 2019 to Present*
- Mentor kids ages 3 to 17 weekly and run Sunday audio visual production for events
